Describe the step-by-step procedures used to complete your project:
I started with a rough sketch, then refined it by adding details and cleaning up the line art. Next, I applied the base colours. For the clothing, I used the pattern brushes provided by the software. I then added a shading layer set to "multiply". After finishing the character, I created the background using a pattern brush over the base background colour. Finally, I added highlights and lighting on a separate layer set to "add."
