I used polymer clay and clay tools to mold the clay together.

Describe the step-by-step procedures used to complete your project:

First I shaped the clay into a starfish and I added dots on top to give it some design. I put it into the oven on top of baking paper and a tray. I put the temperature on 120. After 30 minutes, I took it out of the oven and it was firm. Then I painted it and I put the varnish on top of it.
