| Name:   | MALONEY LALAVANUA |             |       |
| Name:   |                   |             |       |
| School: | S.C.C.S.          | Cust. Code: | SUVOI |

## State the purpose, or reason for your project:

The purpose of this project was to learn about natural disasters and understand how they affect people, communities and the environment. Through this collection, I was able to understand how nature works and how people can respond wisely during emergencies.

## Record the process or steps used in preparing your project:

1. Chose the topic "Natural Disasters."
2. Researched information from books, websites, and school resources.
3. Collected facts and pictures about earthquakes, volcanoes, and cyclones.
4. Organized the information under different headings.
5. Wrote mini summaries and important points for each disaster.
6. Added illustrations, photographs to make the project attractive and informative.
7. Checked and arranged the final work neatly into the collection book.

## What has been illustrated, or what is the conclusion drawn from your project:

In conclusion, natural disasters are powerful events that remind us of the importance of preparedness, safety and caring for others.

| Give a brief background of your collection or topic that you researched, and why you chose that particular item/topic:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <p>Natural disasters are events caused by natural processes of the Earth that can harm people and the environment. In this project, I researched earthquakes, volcanoes, and cyclones because they are among the most common and powerful natural disasters in the world. Cyclones are especially important to study because countries like Fiji often experience several tropical cyclones.</p> <p>I chose this topic because I wanted to learn more about how these disasters happen, how they affect people's lives, and how communities can stay safe and prepared. This topic is interesting, educational, and important for everyone to understand.</p> |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
