(Please ✓ the appropriate box)

☒ Collection ☐ Engineering ☐ Research ☐ Theoretical

Name:	Helena Rachel Waga		
Name:			
School:	Suva Christian Community School	Cust. Code:	SUVOI

State your purpose, hypothesis, or reason for your project:

My purpose for this project to learn about the different seeds God has created.

Record the process or steps used in solving or approving the problem (hypothesis) or include an illustration of how your project works:

1. I looked at pictures of the seeds and read about them.
2. I bought the seeds from the market and supermarkets.
3. I cut a cardboard from a box at home.
4. I covered the cardboard with green paper and taped the edges with sticky tape that had prints on it.
5. I typed the names of the seeds and wrapped the seeds in gladwrap.
6. I used double-sided tape to glue the wrapped seeds and labels on the green board.
7. I wrote all the seed information, printed in a small booklet and stapled the sides of the book.

What has been proved or illustrated, or what is the conclusion drawn from your project:

Seeds came from God and men use it for food, farming and business. It is important to have good seeds so the quality and variety of seeds must be preserved for future generations.

SCIENCE REPORT - Continued

Give a Scriptural application or reference for your project:

Then God said, "I give you every seed bearing plant on the face of the whole earth and every tree that has fruit with seed in it. They will be yours for food." Genesis 1:29

Give a brief history of the discovery/invention or the hypothesis/facts you are using in your project. Describe how the discovery/invention advanced to today's use, give your opinion of its future use:

Seeds are essential to life on Earth. Seeds are "packaged" baby plants that can survive for years.

Human have been collecting and cultivating seeds for thousands of years, from foraging to farming.

The Millennium Seed Bank at Kew Gardens, USA, stores billions of seeds from around 40,000 species to protect biodiversity.

The seed business/market in the USA is massive. US farmers spent \$22 billion on seeds in 2018.
