(Please ✓ the appropriate box)

☒ Collection ☐ Engineering ☐ Research ☐ Theoretical

Name:	ELEANOR A. DATON		
Name:	AIMEE R. MARCELLI		
School:	Destiny Intercultural Academy (DIA)	Cust. Code:	DEST06

State your purpose, hypothesis, or reason for your project:

The reason for our project is so people can expand their knowledge about shells.

Record the process or steps used in solving or approving the problem (hypothesis) or include an illustration of how your project works:

First, we gathered our supplies, then we cleaned the box thoroughly, and we painted the box with blue, brown, white, and peach, and we decorated the box with other small shells. Then we typed in the facts and names of the shells we chose. Then after we printed it, we cut the facts and names in different shapes. And then we glued the shells and facts on the box. Then we cleaned it once more until there was no dust anymore. After that we submitted to Miss Sasha.

What has been proved or illustrated, or what is the conclusion drawn from your project:

So some shells are fossils of other shells and 50% are snails (dead snails)

SCIENCE REPORT - Continued

Give a Scriptural application or reference for your project:

O that thou hadst hearkened to my commandments! then had thy peace been as a river, and thy righteousness as the waves of the sea: Isaiah 48:18

Give a brief history of the discovery/invention or the hypothesis/facts you are using in your project.
Describe how the discovery/invention advanced to today's use, give your opinion of its future use:

*The Atlantic Bay Scallop species is *Argopecten Irradians*. They have up to 200 "ocean eyes". They have a very short lifespan.
* Madagascar clam species name is "Germainia", they are 150- to 160-million-year-old - Jurassic - period fossils, and are a serious violation of endangered species protection.
Shells can be a decoration for an art project or a project in sand.
