☐ Scrapbooking

☐ Bilum Making

Use this form for all Manual Arts entries EXCEPT for any Needlework

Purpose or use of item: Decoration

Describe your source(s) of ideas (eg. photo, library book/video):

My art class teacher, Claire Nicholls made an example for us to follow.

List the materials and tools used in completing your project:

White clay, cutting wire, needle tool, scratch tool, wedging board, glazes, old tooth brush, rolling pin, slip, brushes, kiln

Describe the step-by-step procedures used to complete your project:

Step 1- I cut a large chunk of white clay out of the packet using a cutting wire.

Step 2- I rolled out a two large balls, one for the base, and one for the tower, into two large flat circles.

Step 3- I cut out a square from one of the circles.

Step 4- I joined one side of the square to the other by...

Date:

using the needle tool to scratch both sides and then attached them by applying slip, thus making the tower.

Step 5- I attached the tower to the base by scratching the necessary areas with the needle tool and applied slip to the scratched areas.

Step 6- I add lumps of clay around the base and used the scratch tool to add texture so they would look like rocks.

Step 7- Then I rolled out two small cylinders for posts at the dock.

Step 8- Next I rolled out a thin sheet of clay for the wooden planks and windows.

Step 9- For the texture of the wooden planks I used the needle tool by randomly scratching lines in the clay.

Step 10- Next I scratched and slipped and the wooden planks onto the tower and base.

Step 11- I added dots on the planks on the lighthouse with a needle tool to look like nails.

Step 12- I added cracks to the lighthouse with the scratching tool and the needle tool.

Step 13- I cut out the windows with the clay knife.

Step 14- I made the roof by first cutting out a circle.

Step 15- I then cut out a triangle and joined each side by scratching and slipping the clay.

Step 16- I then drew tiles into the roof with the needle tool.

Step 17- I added some wear and tear to the roof by using the scratching tool.

Step 18- I fired the lighthouse and roof in the kiln.

Step 19- I glazed the lighthouse with white and red.

Step 20- I glazed the wooden planks brown and the rocks and base gray.

Step 21 - I glued the roof and top part of the lighthouse white.

Step 22 - I fired the lighthouse again.

Step 23 - I attached the roof onto the lighthouse using bluetack.
