Imagination of a small sinkhole cave waterfall.

List the materials and tools used in completing your project:

pencil, eraser

fountain pen, whiteboard marker

Describe the step-by-step procedures used to complete your project:

The step by step technique of art is basically patience, aesthetics, and prayer to God.

This should be my first formal pen and ink, before this I only used pen for outlining. First I sketched with pencil, then with fountain pen from left to upper left and to right, finally the water surface. The large areas of black are mixed with whiteboard marker. I want to convey an ancient, primitive feel, so the brushstrokes are resistant.

Based on above, I would like to talk more about what I learned in my drawing process: patience

Patience includes before, during, and after drawing. Deep contemplation during preparation is extremely important, it determines how you proceed with the subsequent drawing.

Adaptability and perseverance during painting are essential, determines the completeness of your work.

The re-examination after completion is necessary, to see if you have completed the work God wanted you to express and made necessary revisions.
