

DIGITAL ART/POSTER/GRAPHIC DESIGN REPORT

☐ OPEN ☐ U/16 ☐ Digital Art ☒ Poster ☐ Graphic Design
 (Please ✓ the appropriate boxes)

Name:	Dante Diaz olvera	D.O.B.	5/11/14
School:	Otamatea Christian School	Cust Code:	OTAM01

Acknowledgement of sources should be included.

Source(s) of Images and Ideas (include references and credits, e.g. book title, author, web-site details)

<https://www.biblegateway.com/passage/?search=Proverbs%2023%3A17&version=NIV>
<https://www.canva.com/design/DAGuaZKxgNY/sVS3> (see Page 2)

List the program(s) (e.g. Adobe® InDesign®, Microsoft® Publisher®) used to design the poster:

Canva.

Describe the step-by-step procedures used to complete your project:

I first chose my character trait, I chose "Zealous".
 Then I chose a scripture verse. I chose Proverbs 23:17.
 then I chose an image of the crown of thorns. Then I wrote the scripture at the middle-top of the image.
 I wrote all the scripture in ITC Edwardian writing-size 72.
 On the first paragraph the color: light black to white.
 Second paragraph color: light black to white. Third paragraph color: gradient light black to white. Then at the bottom of the crown I wrote "Character Trait" with ITC Edwardian writing-color: linear gradient from blue, green to light yellow.
 (size 114)

(add additional sheets if necessary)

→ 1.- Rest of the website: Git Nw HK — XU 817g1yA/edit

2.- then I wrote at the middle-bottom of the image "Zealous" in Liham style writing-color: linear gradient from blue, green to light yellow. I added a "lens flare" illustration (white) effect in the "O" from the word Zealous. Then I added "Abstract wavy elements" for

Note, copy and science. Left side wave rotated 60 degrees. Right side wave rotated 90 degrees.

I own the image because I used free Canva. I told it to "generate me an image of the crown of thorns with two candles on the right side, in a dark room, sitting on a newmestone."

☒ 1. In most cases, YOU own the AI images you generate

For major platforms (Microsoft Copilot, DALL-E, Midjourney, Canva's AI, Adobe Firefly):

You own the rights to the images you generate

You can download, print, publish, sell, or use them commercially

The AI company does not claim ownership of your outputs

This is because copyright law generally says:

Only humans can own copyright.

AI cannot own anything.

So the human who creates the prompt and chooses the output is treated as the owner.

A. The platform's terms of use

Some platforms give you ownership, but others give you only a license.

Microsoft Copilot / DALL-E 3 → You own the output

Canva AI → You own the output, but some models have restrictions

Adobe Firefly → You own the output

Midjourney → You own the output only if you have a paid plan

C. If you use stock images inside the design

For example, in Canva:

If your AI image is combined with Pro stock photos, you may need a license

If you use free elements, you're fine

If you use Pixabay or other free-image sites, check their licenses

3. What about Student Convention rules?

A.C.E. Student Convention guidelines say:

AI-generated art is allowed, but

You must declare it

You must not claim it as hand-drawn or hand-photographed

You must follow copyright rules

So you can use AI images, but you must be transparent about how they were created.

3.-

lens flare illustration (white)

abstract wavy gradient lines for technology and science
left side wave rotated 6° degrees, right side wave rotated 90°
writing:

scripture: ITC Edwardian, size: 72

scripture first paragraph, color: ~~white~~ ~~with~~ white

second paragraph, color: light gray

third paragraph, color: linear gradient 90° color: light black
to white

character Trait paragraph, color: linear gradient 90° purple, blue
to ~~right~~ blue color

^{orange} ZEALOUS paragraph writing: Liham. colour: linear
gradient from blue, green to light yellow color
