Name:	MIRIAMA DEBORAH		
Name:			
School:	S.C.C.S	Cust. Code:	SUVOI

State the purpose, or reason for your project:

To study how mangroves protect the environment and why they are important for people and nature.

Record the process or steps used in preparing your project:

1. Collected informations and compile it into a booklet.
2. Do a 3D model

What has been illustrated; or what is the conclusion drawn from your project:

Mangroves protect our land, sea life, and communities. We must care for them to protect the future.

SOCIAL STUDIES REPORT - Continued

Give a Scriptural application or reference for your project:

Psalm 24:1. "The earth is the Lord's, and everything in it."
Genesis 2:15. "Take care of it."

Give a brief background of your collection or topic that you researched, and why you chose that particular item/topic:

This collection is about mangroves and their importance to the environment, especially in Fiji. Mangroves are coastal trees that grow in salty water and help protect shorelines from erosion, storms, and cyclones. They also provide a habitat for many marine animals and support fishing communities. I chose this topic because mangroves are an important part of Fiji's environment and help protect villages from natural disasters. I also wanted to learn how nature supports both people and wildlife. This topic is important because it teaches us to care for God's creation and protect mangroves for future generations.
